**TRANSCRANIAL
ELECTROSTIMULATION**
Experimental and Clinical Studies

Edited by
Professor Valery P. Lebedev, MD, PhD, D-r Sci

Saint-Petersburg
2005

CONTENTS

| | |
|------------------------|----|
| Preface | 17 |
| Introduction | 19 |

I. Reviews

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 1. <i>Lebedev V. P.</i> Transcranial electrostimulation: a new approach | 22 |
| 2. <i>Rychkova S. V., Aleksandrova V. A.</i> Transcranial electrostimulation of the brain endorphinergic structures as a new nonpharmaceutical method of treatment | 39 |
| 3. <i>Shalyapina V. G.</i> Stress as cause of neuroendocrine pathology | 50 |

II. Experimental studies of transcranial electrostimulation effects

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 2. <i>Lebedev V. P., Katznelson Ya. S., Leosko V. A., Baranovsky A. L., Shlemis G. I.</i> Anesthesia in laboratory animals as a result of stimulation with combination of direct and impulse currents | 58 |
| 5. <i>Lebedev V. P., Savchenko A. B., Fan A. B., Zhiliaev S. Yu.</i> Transcranial electroanalgesia in rats : optimal regimen of electrostimulation | 62 |
| 6. <i>Leosko V. A., Shlemis G. I., Baranovsky A. L.</i> The characteristics of electrical currents and types of devices used for transcranial electroanalgesia | 73 |
| 7. <i>Kovalev M. G.</i> Comparative experimental study of the analgesic effects of the new method of transcranial electrostimulation and Limoge's method | 76 |
| 8. <i>Airapetov L. N., Zaichik A. M., Trukhmanov M. S., Lebedev V. P., Sorokoumov V. A., Abisogomian V. G., Kodzaev Yu. K., Katznelson Ya. S.</i> Changes of β -endorphin concentration in the brain and cerebro-spinal fluid elicited by transcranial electroanalgesia . . | 78 |
| 9. <i>Lebedev V. P., Savchenko A. B., Katznelson Ya. S., Krasiukov A. V., Petriaevskaya N. V.</i> Opiate mechanisms of the transcranial electroanalgesia | 91 |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 10. <i>Lebedev V. P., Savchenko A. B., Otellin V. A., Kucherenko R. P.</i> Role of the brain serotonergic system in the origin of transcranial electroanalgesia | 106 |
| 11. <i>Savchenko A. B., Pavliuchenkova M. O.</i> Study of possible role of GABA-ergic and acetylcholinergic brain systems in origin of transcranial electroanalgesia | 126 |
| 12. <i>Joy M. L. G., Lebedev V. P., Gatti J.</i> Investigation of current density and current pathways in the rabbit brain during transcranial electrostimulation by means of magnetic resonance tomography | 128 |
| 13. <i>Enin L. D., Lebedev V. P.</i> Peripheral mechanisms of analgesia elicited by transcranial electrostimulation | 149 |
| 14. <i>Lebedev V. P., Kozlowski G. P.</i> Inhibitory effect of transcranial electrostimulation on C-FOS expression in some regions of the forebrain. | 163 |
| 15. <i>Krasiukov A. V., Lebedev V. P., Katznelson Ya. S., Fan A. B.</i> The effects of the transcranial electrostimulation in analgesic regimen on the somato-sympathetic reflexes | 183 |
| 16. <i>Medvedev O. S., Fan A. B., Dugin S. F., Martinova E. R., Glukhovtsev E. V.</i> Experimental study of transcranial electroanalgesia effects on some characteristic of systemic and regional haemodynamics . . . | 194 |
| 17. <i>Levtov V. A., Shuvaeva V. N.</i> The effects of transcranial electroanalgesia on the blood rheology. . . | 196 |
| 18. <i>Ilinsky O. B., Lebedev V. P., Savchenko A. B. Solovieva A. I., Spevak C. E.</i> The effect of the uninvasive transcranial electrostimulation of the brain antinociceptive structures on the repair processes | 198 |
| 19. <i>Kolosova L. I., Akoev G. N., Lebedev V. P., Moiseeva A. B., Riabchikova O. V.</i> Effects of transcranial electrostimulation in analgesic regimen on the functional repair of the damaged sciatic nerve | 207 |
| 20. <i>Zavialov A. I., Khokhlova L. I.</i> The effect of transcranial electrostimulation on the genetic alcoholic motivation in rats | 215 |
| 21. <i>Aleksandrov V. A., Kovalevski A. V., Lebedev V. P., Savchenko A. B., Ushmorov A. G., Ilinski O. B.</i> Experimental study of the effects of the transcranial electrostimulation and dalargin on the malignant tumor growth and efficacy of the antitumor chemotherapy | 221 |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 22. <i>Rubtsovenko A. V., Kade A. Kh., Parakhonski A. P., Borovikov O. V., Lebedev V. P., Panov A. G.</i> Immunotropic effects of the transcranial electrostimulation | 240 |
| 23. <i>Gritskevich N. L., Guschin G. V., Katznelson Ya. S., Korneva E. A., Lebedev V. P., Lobzhanidze N. Sh., Fomicheva E. E.</i> Changes of some peculiarities of the nonspecific resistivity elicited by transcranial electrostimulation in analgesic regimen . . . | 252 |

III. Clinical studies of the transcranial electrostimulation effects

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 3. <i>Kovalev M. G., Lebedeva A. V., Lebedev V. P., Kharakhordin N. E., Katznelson Ya. S., Fan A. B.</i> Trends of the transcranial electroanalgesia application in thoracic and abdominal surgery | 259 |
| 25. <i>Evtiukhin A. I., Aleksandrov V. A., Dunaevski I. V., Shabut A. M.</i> Experimental and clinical study of some possibilities of the transcranial electrostimulation application in oncology | 296 |
| 26. <i>Voitenko ER. I., Katznelson Ya. S., Kapustin S. M.</i> Application of the transcranial electroanalgesia in the peripheral nerve surgery | 305 |
| 27. <i>Kondratiev A. N., Lebedev V. P., Legeza D. V., Levkovich Yu. I.</i> Transcranial electrostimulation in maintenance of anesthesia in neurosurgery | 310 |
| 28. <i>Dovnar T. E., Lebedeva A. V., Shkliarevich N. A., Barchuk D. A.</i> The immune status of patients with bronchial and lung diseases after endogenous opioid system stimulation during surgical treatment | 314 |
| 29. <i>Serdobintsev M. S., Tikhodeev C. A., Lebedev V. P., Nakonechny G. D.</i> Application of the transcranial electroanalgesia in postoperative treatment of patients with tuberculosis of big joints | 334 |
| 30. <i>Gretsov S. I., Katznelson Ya. S., Kirsanova G. V., Gurchin F. A., Starikova I. O., Lebedev V. P., Sorokoumov V. A.</i> Application of the transcranial electroanalgesia in treatment of spondilogenous pain syndromes | 346 |
| 31. <i>Akimov G. A., Lebedev V. P., Shapkin V. I., Odinak M. M., Volkov A. K., Katznelson Ya. S.</i> Transcranial electrical influences in treatment of neurological pain syndromes | 352 |

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 32. <i>Voitenko E. I., Kokin G. S., Lebedev V. P., Tishkevich T. G.</i> Transcranial electroanalgesia in treatment of pain syndromes elicited by the damages of peripheral nerves | 355 |
| 33. <i>Sorokoumov V. A. Gretsov S. I., Voitenko E. I., Skoromets A. A., Lebedev V. P., Katznelson Ya. S., Kokin G. S.</i> Elimination of pain syndromes and autonomic reactions during and after pneumoencephalography by means of transcranial electroanalgesia. | 360 |
| 34. <i>Rybak V. A.</i> Transcranial electroanalgesia in treatment of generalized pain syndromes of nonorganic origin. | 363 |
| 35. <i>Zakharzhevski V. B., Artemchuk N. L., Veselovski M. N., Kratin Yu. G., Kuzemkin V. A., Kuznetsova I. B., Sviatogor I. A.</i> Transcranial electroanalgesia in treatment of pain syndromes in neurotic patients. | 370 |
| 36. <i>Shmonin A. V.</i> Application of the transcranial electroanalgesia in regional hospital. Estimation of optimal frequencies. | 378 |
| 37. <i>Gerasimova L. I., Kondrikova E. S., Gritshenko A. V., Karev V. A., Putintsev A. N.</i> Efficacy of the transcranial electrostimulation in treatment of burned patients. | 380 |
| 38. <i>Vasenev E. E.</i> Transcranial electrostimulation as a new method for treatment of stomalgies | 390 |
| 39. <i>Kasimova M. D., Markov N. V., Alieva Z., Mamedova D.</i> Some experience of application of a new method of electroanalgesia for relief of chronic and acute eye pain | 393 |
| 40. <i>Bakman A. M., Manikhas G. M.</i> 8-year experience of application of the transcranial electroanalgesia for pain relief in oncological patients | 395 |
| 41. <i>Zabolotnykh I. I.</i> Transcranial electrical treatment in rehabilitation of patient with primary deformatant arthrosis | 402 |
| 42. <i>Lebedev V. P., Katznelson Ya. S., Lebedeva A. V., Kiryianova T. D., Zabolotnykh V. A.</i> Some peculiarities of central haemodynamics of humans during and after transcranial electrostimulation of the brain stem opioid structures | 408 |
| 43. <i>Zabolotnykh V. A., Zabolotnykh I. I.</i> Treatment of symptomatic arterial hypertension by means of stimulation of brain opioid system | 417 |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 44. <i>Akimov G. A., Zabolotnykh V. A., Lebedev V. P., Zabolotnykh I. I., Chuprasova T. V., Afoshin S. A., Rozanov S. I., Kassin P. L., Vunsh I. G., Preobrazhenskaya S. L., Efimova I. E., Brovin A. N.</i> Transcranial electrical stimulation in treatment of vasomotor dystonia | 420 |
| 45. <i>Volkov A. K.</i> Corrections of preclimacteric disturbances in outpatient clinic by means of transcranial electrostimulation | 428 |
| 46. <i>Golikov A. P., Pavlov V. A., Karev V. A., Polumiskov V. Yu., Lebedev V. P., Katznelson Ya. S., Trofimov A. K., Ilinski O. B.</i> Effects of transcranial electrostimulation of opioid systems on repair processes in patients with myocardial infarction | 432 |
| 47. <i>Aleksandrova V. A., Rychkova S. V., Lebedev V. P., Zilber Yu. D., Stepanova M. V., Kiselev Yu. V., Katznelson Ya. S., Levkovich Yu. I.</i> Effects of transcranial electrostimulation of the brain opioid structures on the repair of ulcers of stomach and duodenal mucous | 439 |
| 48. <i>Rychkova S. V., Aleksandrova V. A.</i> Effects of transcranial electrostimulation on autonomic disturbances in children with gastroduodenal diseases. | 451 |
| 49. <i>Rosenblum A. S., Lebedev V. P., Kraeva N. I., Tsyrl'nikov E. M.</i> Application of transcranial electrostimulation for treatment of patients with sensorineural hearing loss. | 454 |
| 50. <i>Kraeva N. I., Lebedev V. P., Pudov V. I., Tsyrl'nikov E. M., Shatilov M. S.</i> Transcranial electrostimulation for treatment of patients with sensorineural hearing loss. Prognosis of efficacy by diagnostic procedure with focused ultrasound | 462 |
| 51. <i>Rasnatovski K. I., Lebedev V. P.</i> Changes of pituitary-gonads-suprarenal gland hormones in patients with dermatosis of palms and foods during and after treatment with transcranial electrostimulation | 468 |
| 52. <i>Zabolotnykh V. A., Zabolotnykh I. I., Pozdisheva S. A., Brovin A. N.</i> Treatment of patients with psychoorganic syndromes of different etiology be means of transcranial electrostimulation . | 478 |
| 53. <i>Bord E. I.</i> Electropsychotherapy as a combination of transcranial electrostimulation and psychological treatment | 482 |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 54. <i>Grinenko A. Ya., Krupitski E. M., Lebedev V. P., Katznelson Ya. S., Karandasheva G. F., Moshkov K. A., Bulion V. V., Iliukhina V. A., Borodkin Yu. S.</i> Application of transcranial electrostimulation for reduction of alcohol abstinence syndrome | 488 |
| 55. <i>Burakov A. M., Krupitski E. M., Grinenko A. Ya., Karandasheva G. F., Lebedev V. P., Katznelson Ya. S., Nikitina Z. S.</i> Treatment of affective disturbances in acoholics during remission with transcranial electrostimulation | 498 |
| 56. <i>Krupitski E. M., Burakov A. M., Grinenko A. Ya., Vostrikov V. V., Lebedev V. P.</i> Application of transcranial electrostimulation to reduce craving for alcohol | 510 |
| 57. <i>Zabolotnykh I. I., Lebedev V. P., Zabolotnykh V. A.</i> Application of transcranial electrostimulation for treatment of allergy | 515 |
| 58. <i>Bushueva N. N., Solodovnikova N. V., Ushan E. V.</i> Treatment of accomodation cramp and light myopia with electrostimulation generated by device ETRANS | 519 |
